LAB-4

Question 1:

Code:

```
import java.applet.Applet;
import java.awt.BorderLayout;
import java.awt.Font;
import java.awt.Graphics;
import java.awt.Label;
import java.awt.TextField;
import java.awt.event.ActionEvent;
import java.awt.event.ActionListener;
public class que1 extends Applet implements
ActionListener{

    TextField field_name,field_id;
    Label l1,l2;
    String name="",id="";

    public void init(){
        field_id=new TextField();
        field_name=new TextField();
        field_name.setBounds(100, 100, 150, 20);
        field_id.setBounds(100, 130, 150, 20);
        l1=new Label("username");
        l2=new Label("userId");
        l1.setBounds(10, 100, 65, 20);
        l2.setBounds(10, 130, 50, 20);
        add(l1);
        add(l2);
    }
}
```

```

        add(field_name);
        add(field_id);

        setLayout(new BorderLayout());
        field_name.addActionListener(this);
        field_id.addActionListener(this);

        setSize(600, 400);
    }

    public void actionPerformed(ActionEvent e) {
        name=field_name.getText();
        id=field_id.getText();
        repaint();
    }

    public void paint(Graphics g){
        Font f1=new
Font("serif",Font.BOLD|Font.ITALIC,22);
        String tname="Hello, my name is "+name;
        String tid ="Id: "+id;
        g.setFont(f1);
        g.drawString(tname,300, 115);
        g.drawString(tid,300, 145);

    }
}
/* <applet code="que1.class" width="300"
height="300">
</applet> */

```

Output :

Question 2:

Code:

```
import java.applet.Applet;
import java.awt.BorderLayout;
import java.awt.Choice;
import java.awt.Color;
import java.awt.event.ItemEvent;
import java.awt.event.ItemListener;
public class que2 extends Applet implements
ItemListener{

    Choice c1;
    String selected_color;
    Color curr_color;
```

```
public void init(){

    c1 = new Choice();
    c1.add("RED");
    c1.add("BLUE");
    c1.add("GREEN");
    c1.add("YELLOW");
    c1.add("BLACK");
    c1.addItemListener(this);
    add(c1);

}

public void itemStateChanged(ItemEvent e) {
    selected_color=c1.getSelectedItem();
    switch(selected_color){
        case"RED":
            curr_color=Color.RED;
            break;
        case"BLUE":
            curr_color=Color.BLUE;
            break;
        case"BLACK":
            curr_color=Color.BLACK;
            break;
        case"YELLOW":
            curr_color=Color.YELLOW;
            break;
        case"GREEN":
            curr_color=Color.GREEN;
            break;
    }
    setBackground(curr_color);
}
```

```
}  
/* <applet code="que2.class" width="600"  
height="600">  
</applet> */
```

Output :

Question 3:

Code:

```
import java.applet.Applet;
import java.awt.BorderLayout;
import java.awt.Button;
import java.awt.Font;
import java.awt.Graphics;
import java.awt.Label;
import java.awt.TextField;
import java.awt.event.ActionEvent;
import java.awt.event.ActionListener;
public class que_3 extends Applet implements ActionListener{

    TextField input1,input2,output;
    Button b1,b2,b3,b4;
    Label l1,l2,l3;

    public void init(){
